Sharp Penetration Tooth

29.6#/13.41kgs.

H&L Tooth Company History since 1931:

This medium sized digging tooth was first designed and introduced in 1963. H&L's Sharp Penetration Tooth was developed and forged at the Hi-Pro Forge Plant, a Division of the H&L Tooth Company in Montebello, California. The Forged 32SP Tooth was originally designed for Wheel Loaders of the day like the Dart DE-620.
