H&L Tooth Company Quality Policy

H&L Tooth commits to meeting or exceeding internal and external customer requirements in its manufacturing and processing of ground engaging tools. This will be achieved by continually improving the effectiveness of our quality system through the establishment and tracking of quality objectives, identifying opportunities for improvements, and teamwork among our employees, customers, and vendors.

Brian L. Launder
Executive Vice President H&L Tooth Company

H&L teeth have offered unique solutions to ground engaging since the early days of earth moving equipment...

H&L TOOTH CONTINUING TO FORGE GROUND ENGAGING TOOLS INTO THE TWENTY-FIRST CENTURY!

H&L Tooth was incorporated when co-founders Chester H. Hosmer and Ernie L. Launder formed a Tooth manufacturing company in 1931.

Manufacturing continued in Montebello, California until H&L's move to Tulsa, Oklahoma in 1987.

Today, H&L's 200,000 square foot forge plant in Tulsa, Oklahoma houses two complete 4" upsetter lines, two 6" upsetter lines, a 7 1/2" and two 9" forge upsetters.

H&L continues to develop innovative ground engaging products for Mining and Construction Industries!
