21SP

Sharp Penetration
3.3#/1.50kgs.

H&L Tooth Company History since 1931:

This fabricated ripping tooth was first designed and introduced in 1953. H&L's Flexpin Tooth system was first developed for an Austin Grader, Model HJD before becoming standard on many models during the 1950s and 60s. Today, copies of the 21SP tooth are being produced by many companies worldwide, if it doesn't say H&L its not the ORIGINAL!
