Ripping Star Tooth  
46.6#/21.11kgs.

*H&L Tooth Company History since 1931:*

*This large sized ripping tooth was first designed and introduced in 1962. The 308 ripping Tooth was developed for CRC-Kelly Manufacturing exclusively. H&L's 308 Series was forged at the Hi-Pro Forge Plant, a Division of the H&L Tooth Company in Montebello, California. This Tooth was originally designed to compete with the 38LST Series. The 38 and 308 are NOT interchangeable!*
