HARDNESS!

ORIGINAL PRODUCT

H&L® TOOTH COMPANY

Factory Direct Made in Tulsa, Oklahoma

The "OEM" fabrication Flexpin tooth design

23SP

Sharp Penetration
2.0#/10.9kgs.

H&L Tooth Company History since 1931:

This fabricated 23SP regular style tooth was first designed and introduced around 1957. This Flexpin type Tooth was first developed for an upgrade for a Hancock Scraper and Clark Loader, all before becoming the preferred standard on many models during the early 1960s. By the late 1960s H&L's 230 size tooth had proven its self as the #1 OEM digging tooth for Backhoes. Today, copies of the 23SP tooth are being produced by many companies worldwide, if it doesn't say H&L its not the ORIGINAL!
