D-1095-3C

Weld-on Nosepiece

2.1#/10.95kgs.

H&L Tooth Company History since 1931:

Over the years many different designed nose adaptations have been manufactured for the 3CH crimp-on style tooth system. H&L's D-1095-3C nose was developed for an OEM in 1997.

Originally this small fabricated crimp-on tooth was first designed and introduced in 1944 and was marketed to fit a medium sized Buckeye and/or Cleveland Wheel Trenching Machine.

Today, copies of the 3CH tooth and nose connection are being produced by many companies worldwide, if it doesn't say H&L its not the ORIGINAL!
