H&L Tooth Company History since 1931:

The LGT-6030-W-325 Leg and One-Half weld-on excavator style adapter was first designed and introduced by H&L Tooth for a J. I. Case OEM Model 125B, 175B and 220B machines in 1994. During the early 1990s, Komatsu Dealer Rocky Mountain Machinery supplied buckets using this 325 series adapter and tooth system.

Today, H&L has a limited number of this "Original" LGT-6030-W-325 adapter and 325 "VP" Series tooth system.
