The "OEM" Cast Value Flexpin Style tooth design

230TF

Fangs Style Penetration

3.9#/1.77kgs.

H&L Tooth Company History since 1931:

H&L's Cast Value 230TF Fangs Style tooth matches the John Deere design. The 230 series tooth-pin-adapter connection is and H&L Original patented design from the 1950s. John Deere states; Fangs "teeth have a self-cleaning effect that lets dirt flow between teeth". For heavy duty rock applications, H&L recommends the FORGED 230CLAW (Fangs) design.
