Long Twin Tiger Penetration

2.1#/0.95kgs.

H&L Tooth Company History since 1931:

This Cast Value 230WTL Long Twin Tiger tooth is a cast copy of the 230TT7 design that was first designed and introduced in 2003. The Long Twin Tiger was developed as a sharper penetration version of the Twin Tiger 230TT tooth, if it doesn't say H&L it's not the ORIGINAL!
